

COMMON DRIVER TRAINER /MRAP VARIANT (CDT/MV)

STANDARD DA PAM 350-9 INFORMATION UNAVAILABLE

Functional Description:

The CDT/MV provides initial and sustainment driver training. The device consists of a simulated vehicle cab, instructor/operator station, a visual system, aural/audio system, and After Action Review station. The trainer has a fully integrated six Degree-Of-Freedom motion system. The instructor, via the instructor/operator station, is capable of selecting a visual scene, viewing the visual scene, monitoring each trainee's performance and introducing malfunction and emergency control situations. This provides the capability to create realistic scenario-based training events mirroring the actual conditions under which Soldiers are expected to perform.

Purpose of Trainer:

The CDT/MV provides training devices for training individual drivers in the skills for operating MRAP vehicles.
